| Size | 126mm(Length)*27mm(Head Diameter)*27mm(Body Diameter) |
| Modes | One mode |
| Color | Black |
| Weight | 90g |

Operating instructions

Battery placement:

Place the battery with
The + towards the
inside

Battery charging:

First-time usage (for flashlights with battery):

Unscrew the back off the flashlight and remove the protection spacer from the battery and fully charge the battery before first usage! The battery is in storage mode and needs to be charged as soon as possible!

During charging the charger led will burn red. The led will turn green when the battery is full. Do NOT leave the battery in the charger when fully charged!

The C255-1 must be used with one rechargeable 21700 Lithium-Ion battery (>5000mAh, minimum 10A discharge type) or one 18650 Lithium-ion battery (>3400mAh, minimum 10A discharge type) with the included spacers. When the battery is almost empty, the flashlight will start to flash and eventually will shut down the lamp. When flashing starts, recharge the battery as soon as possible!

Warning:

1. Place the battery with the + to the inside. Reverse placement can destroy the flashlight and battery.
2. NEVER look directly into the light beam. This can damage your sight! Wear safety glasses! UVC radiation is invisible! UVC radiation is harmful!
3. This lamp is NOT suitable for children, it is NOT a toy.
4. Don't aim the light beam directly to your skin. Exposure can damage the skin tissue! UVC radiation is harmful!
5. Never point the light beam to any other living person or animal! UVC radiation is harmful!
6. Do not operate the lamp for more than 5 mins continuous. Use it with intervals to cool it down. Overheating the Led will cause it to fail.
7. Do not disassemble the flashlight or make any modifications. This will void the warranty.

Warranty:

The C255-1 UV flashlight has a one year factory carry-in warranty. The warranty starts on the date of delivery. The warranty will void if the lamp is modified or broken due to fall, damage, improperly handling or battery leakage.

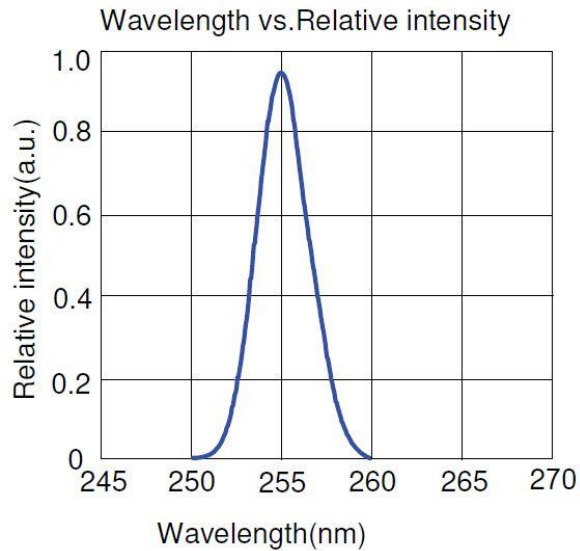

Technical Specifications:

Colorgems C255-1 lamp power: ~ 5W

Temperature controlled Led driver. When the Led reaches the maximum operating temperature of 55°C, the driver will reduce the current through the Led allowing it to cool down. This will reduce output of the Led as well. Allow the lamp to cool down to be able to use full brightness.

Led spectrum:

Operating times fully charged battery:

21700 battery: > 4hrs

18650 battery: < 3hrs

Led useful lifetime: ~5000hrs

Filter useful lifetime: ~1000hrs

Advised filter replacement interval: 1 year
