## Operating instructions

### Battery placement:

Place the battery with

The + towards the

inside

### Battery handling:

Fully charge the battery before first usage! Most new batteries are in storage mode and need to be charged as soon as possible!

After charging return the battery in the flashlight according to instructions. **Fasten tail cap tightly!**

The B310-Mini must be used with one rechargeable 21700 Lithium-Ion battery (>4500mAh, minimum 10A discharge type) or one 18650 Lithium-ion battery (>3400mAh, minimum 10A discharge type). When the battery is almost empty, the flashlight will start to flash and eventually will shut down the lamp. When flashing starts, recharge the battery as soon as possible!

### Warning:

1. Place the battery with the + to the inside. Reverse placement can destroy the flashlight and battery.
2. **NEVER look directly into the light beam. This can damage your sight! Wear safety glasses! UVB radiation is invisible! UVB radiation is harmful!**
3. **This lamp is NOT suitable for children, it is NOT a toy.**
4. **Don't aim the light beam directly to your skin. Exposure can damage the skin tissue! UVB radiation is harmful!**
5. **Never point the light beam to any other living person or animal! UVB radiation is harmful!**
6. Do not operate the lamp for more than 5 mins continuous. Use it with intervals to cool it down. Overheating the Led will cause it to fail.
7. Do not disassemble the flashlight or make any modifications. This will void the warranty.

### Warranty:

The B310-Mini UV flashlight has a one year factory carry-in warranty. The warranty starts on the date of delivery. The warranty will void if the lamp is modified or broken due to fall, damage, improperly handling or battery leakage.
